d. Trees shall be balled and burlapped and shall have a minimum trunk diameter of 2½ inches measured at 12 inches above the ground level. They shall be northern grown in a nursery, and shall have been transplanted twice, the last transplanting being not less than 4 years prior to planting. All trees shall be tagged and identified as to species, size and place of origin. Such tags shall not be removed by the Subdivider prior to inspection by the Village. All trees (original or replacement) determined by the Village to be diseased or not in vigorous growing condition after 2 growing seasons shall be replaced at the beginning of the next succeeding planting season, at no cost to the Village. Tree planting shall be done during the proper season. No planting shall be done in frozen soil or during unfavorable weather conditions.
